DETAILED ACTION

Allowable Subject Matter

Claims 1-19 are allowed.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

In regard to independent claims 1 and 13, the prior art does not disclose or render obvious the signals being respectively associated with an input element, a reference element and a parasitic element, where all these elements are coupled in a same current or voltage path, having a common driving signal of the same value and in the combination as claimed.

Claims 2-12 and 14-19 depend from an allowable base claim and are therefore allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Pertinent prior art is as follows::

Van Herzeele (6400295) is the US Patent of EP 1102405.

Ho et al. (20020113586) discloses a method and apparatus for offset detection and correction.

Tanizawa (6598484) discloses a physical quality detection device, that contains correction for offset.
